

CROSS-BORDER LOGISTICS OPERATIONS: THE U.S.-MEXICO BORDER

Although carriers only have to cover a few miles to move between the U.S.-Mexico border, cross-border operations add a layer of complexity to the supply chain.

CHALLENGES

There are many potential issues that can cause a border crossing delay, such as wrong paperwork, missing paperwork or miscommunications. Proactively managing operations through visibility, seamless communication and expertise ensures nothing is overlooked in the supply chain.

SOLUTIONS

With more than 30 years of experience crossing the U.S.-Mexico border, Penske Logistics has the procedures and relationships in place to get goods across the border quickly and efficiently.

To optimize supply chain operations at the border and within Mexico, we offer:

- Strategic locations around the border
- Expert experience managing cross-border operations
- ClearChain™ technology suite
- Increased supply chain visibility

- Established relationships and certification with border and regulatory agencies
- Certification from the Customs-Trade Partnership Against Terrorism (C-TPAT)
- Reduced border crossing times by employing Free and Secure Trade (FAST) lanes

TECHNOLOGY

EXPERTISE

300
employees in
Laredo, TX

~2,600
associates
across Mexico

Large transportation
fleet based
in Laredo, TX

Manage 6 warehouses on
U.S. Border; 11 in Mexico

The Penske technology suite, ClearChain, provides complete, accurate and timely data that connects people in the supply chain with the information needed to deliver powerful business results, such as:

- Real-time load status
- Ability to track and trace shipments
- Part-level shipment details
- Insights to identify shipment inconsistencies
- Seamless communication with customers

This visibility allows Penske team members to pull data and information quickly, and creates checkpoints throughout the supply chain so all parties know what is needed, what is coming and when it will arrive.

- Customs brokerage
- Full complement of IT services
- Cross-docking

- Milk run collection
- Cross-border drayage
- Door-to-door logistics
- Repacking of materials
